

EAST THAMES
AGGREGATES
LIMITED

SUSTAINABLE TRANSPORT POLICY

East Thames Aggregates Limited aim is to reduce the company's Carbon Footprint wherever possible and thereby strive towards the least Environmental Impact Operations in delivering our services to ALL Customers.

The Company will adhere to any new Government Guidelines to Vehicle Emissions and operational procedures where possible.

To achieve our aims and offering the most sustainable ways in delivering our service, we will:

- Look to reduce our vehicle movements wherever possible by back-loading and using the nearest facilities, thereby reducing vehicle miles.
- Use where practicable, smaller vehicles to deliver Part or Smaller Loads and where possible enable our weigh-loader vehicles to deliver multi-drops.
- Using ONLY current Euro 6 Vehicles or Hybrid if available.
- Utilise newest technology where possible to 2035 E-hybrid and 100% electric if available exists.
- Work closely with Customers and Site Operators to minimise returned or diverted loads and reduce waiting idling HGV's.
- Meet or surpass ALL legal compliance legislation, regulations and standards associated with Transport Operations.

This document has been authorised by an acting Director
Mr. J A Rogers (Director) East Thames Aggregates Limited.
